INTERROGATORIES AND REQUESTS TO PRODUCE

Q. 1. Please provide an analysis showing the economic impact a 50-75 foot wide utility right of way cutting through Addison County will have on future development in the region. Bear in mind that this right of way will be a “no build” and “no trees” zone and although the gas companies claim there isn't a safety issue in building less than 300 feet from a transmission pipeline such as the one proposed, some town plans are currently being altered to address these set back recommendations.
