

Improve your bottom line. And benefit the environment.

Vermont Gas is unique among fuel suppliers in having a proactive, award-winning Energy Efficiency Department. We're committed to saving your business money and energy, and helping you be a good steward of the Vermont environment.

Whether you're renovating an office building, looking for a more efficient process or heating system for your business, or building a manufacturing plant from the ground up, we have an energy-saving program to match! Our commercial energy experts can recommend high efficiency equipment, advise you on environmentally sound gas energy practices, and offer tips for tightening your building and creating a more comfortable workplace for your employees!

Put energy efficiency to
work for your business!

RETROFIT PROGRAM:

VGSO12485

Start with a free walk-through

energy audit!

If your structure qualifies, we'll send one of our efficiency specialists to conduct a walk-through

energy

audit, at no

cost. We'll

examine

the building

envelope,

heating

equipment,

windows,

doors,

controls,

insulation,

you name

it. Once we've identified any problem areas,

we'll make efficiency recommendations.

Our follow-up engineering analysis will

include building-improvement costs and their

potential annual savings, as well as any

financial incentives from

Vermont Gas.

And we'll be happy

to give you a list of

qualified contractors

and engineers, and even

offer suggestions to help

you choose the right

one for the project.

Thermographic scan to reveal poor or missing insulation

EQUIPMENT REPLACEMENT

PROGRAM: Watch the savings

add up!

Replacing and heating and

equipment

can represent

a significant

investment for

your business.

But with high-

efficiency

systems, the

long-term

pay-off can

be huge.

And on a

comfort level,

the impact is immediate. As encouragement,

Vermont Gas typically offers rebates on the

following energy-saving equipment:

- Unit heaters

- Furnaces

- Hot water boilers

- Steam boilers

- Modulating burners

- Pool heaters

- Domestic water heaters

- Venturi steam traps

- Kitchen exhaust hoods

- Air to air heat recovery equipment

- Waste heat recovery equipment
- Heat exchangers

NEW CONSTRUCTION PROGRAM:

Information central for builders!

Attention architects,

developers and

engineers! Are you

looking to make

your new building

as energy efficient

as possible? Want

to know about

incentives for implementing energy-saving

measures? Need help navigating Act 250?

Our team of energy specialists can:

- Review your building plans, complete with an engineering analysis of potential energy-saving measures.

- Give you information on energy efficient equipment,

manufacturers, and

the latest construction

techniques and

building materials.

- Provide technical assistance for

Act 250 permit

applicants who've

chosen natural gas

as a fuel source.

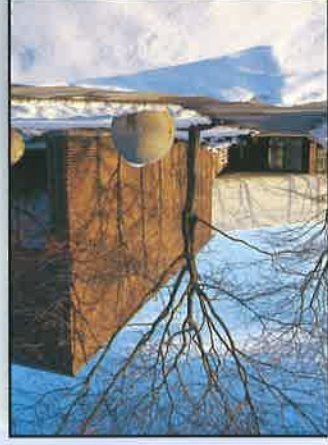

- Help with financial incentives for efficiency

measures and equipment.

- Help with evaluation of LEED registered projects.

- Get you energy code information.

- Put you in touch with utility and energy efficiency organizations that may provide additional assistance.

Log on to learn more!

Visit our website at www.vermontgas.com for complete details on these programs. You can request a free walk-through energy audit online, as well as find links to various efficiency websites, among other things. Got a specific question for our energy experts? We welcome your calls at 863-4511, ext. 389.

Questions about energy efficiency?

Call 802-863-4511, ext. 389. Or check one of the following boxes that describe your business needs:

You're a business owner or manager and are considering replacing your furnace, boiler or any other process equipment (Vermont Gas offers rebates through our Equipment Upgrade Program.)

You're an existing business customer and you'd like a free walk-through energy audit of your facility.

You're building a new facility or substantially renovating an existing business. (Vermont Gas offers incentives for installing high efficiency equipment that exceeds current standards or codes.)

You're a new customer of Vermont Gas, or considering becoming a customer, and wish to speak with a Vermont representative about our program offerings.

You're a business owner or manager and are considering replacing your furnace, boiler or any other process equipment (Vermont Gas offers rebates through our Equipment Upgrade Program.)
